The Bitrism East-1 exploratory well is currently producing 7.0 million standard cubic feet of gas per day (MMSCFD) and 200 barrels of condensate per day from the Basal Sands. Production is expected to increase gradually as the well's flow stabilises.

OGDC announced the gas and condensate discovery at Bitrism East-1 on October 1, 2025, in the Massive and Basal Sands of the Lower Ghor

OGDC is the operator of the Bitrishtan Exploration Licence with a 77.5 percent working interest, in a joint venture with Government Holdings (Private) Limited (GHPL), which holds the remaining 22.5 percent.

The commencement of production from Bitrism East-1 reflects OGDC's continued focus on bringing new discoveries into production, enhancing domestic hydrocarbon supplies and contributing to Pakistan's energy security.

China appreciates Djibouti's adherence to the one-China principle and hopes that Djibouti will continue to firmly support China on issues concerning its core interests, Wang said.

Since the beginning of this year, Wang said, China has proposed four principles of the constructive participation of relevant parties in the resolution of African hotspot issues, and proposed a series of initiatives on promoting peace and security in the Middle East. These efforts, he noted, demonstrate China's role as a responsible major country and align with people's aspirations for peace in the region.

China is willing to work with Djibouti and other countries to enhance communication and cooperation, strive to ease tensions and earnestly maintain peace and stability in the region, Wang said. Omar said that since the establishment of diplomatic relations between the two countries, Djibouti has been developing relations with

Wang said that China values the comprehensive strategic partnership between China and Djibouti and is willing to further deepen pragmatic cooperation with Djibouti, adding that both sides should give full play to China's zero-tariff
