Gas load management begins as Pakistan faces winter LNG supply risks

By Khalid Mustafa

ISLAMABAD: Gas load management has begun for domestic consumers as Pakistan faces growing uncertainty over LNG supplies from Qatar amid the ongoing Strait of Hormuz crisis, with authorities restricting household gas supply to key cooking hours.

The force majeure declared by Qatargas on March 4, 2026, following the halt on its LNG production, yet formally been lifted due to a lack of tangible progress

between Iran and the United States on reopening the Strait of Hormuz and ending the US naval blockade. In the month of September, Pakistan arranged two RLNG cargoes – one reached on September 10 and other reached on September 23 from Qatar with the help of Iranian officials concerned.

A senior official of the Petroleum Division told The News that domestic consumers are currently being

Continued on page 9

Continued from page 12

hours each in the morning, at lunchtime and during dinner hours. "We are providing three hours of gas in the morning from 6am to 9am, at lunch from 12pm to 3pm and during dinner time from 6pm to 9pm, as the system does not have enough gas to provide it to the domestic sector 24/7. The power sector also consumes imported gas, including the less available RLNG, for power generation," the official said.

Pakistan's domestic gas production stands at around 3.2 billion cubic feet per day (bcfd), while the country has agreements with Qatar and Italy's ENI for the import of around 1 bcfd of RLNG. Officials, however, are increasingly concerned about meeting demand during the coming winter as LNG availability remains uncertain.

The government may decide next month to purchase spot LNG cargoes for October to meet rising requirements, as the win-

ter season will begin in the coming weeks in central and northern Punjab and Khyber Pakhtunkhwa. Authorities are also making efforts to secure more than two LNG cargoes from Qatar, but officials say the availability of these supplies will depend heavily on developments in the Strait of Hormuz.

The pressure on LNG supplies is expected to intensify during winter. Pakistan will require nine LNG cargoes in December 2026 alone to meet the requirements of the domestic, industrial and power sectors. A Qatari delegation is scheduled to visit Pakistan from September 30 to October 15 to finalise the Annual Delivery Plan (ADP) for LNG cargoes for the 2026-27 winter season.

Officials said the geopolitical situation in the Middle East has made it difficult to determine whether Qatar will be able to maintain smooth LNG supplies to Pakistan under the two long-term agreements. Under the

agreements, Qatar is committed to supplying five LNG cargoes a month at 13.37 percent of Brent and four cargoes a month at 10.2 percent of Brent.

In the recent past, Pakistan had faced an LNG surplus, prompting authorities to divert two LNG cargoes a month from Qatar to international markets under the Net Proceeds Differential (NPD) mechanism. According to officials, around 24 cargoes will not be received by Pakistan during 2026 as a result of such diversions. Reports have also emerged that Qatar diverted 24 cargoes originally intended for Pakistan to Egypt under the NPD clause.

Under the NPD arrangement, Pakistan does not receive the profit when a cargo allocated to it is sold in the international market at a profit. However, if the cargo is sold at a loss, Pakistan bears the loss. The availability of the remaining cargoes will depend on the situation in the Strait of Hormuz.

Pakistan has also

diverted LNG cargoes from ENI to international markets in the past because of the LNG surplus. Under the agreement with the Italian company, Pakistan LNG Limited shares the profit and loss from the sale of diverted cargoes. Officials said ENI has so far sold Pakistan's diverted cargoes at a profit. Officials said ENI will provide one LNG cargo each in January 2027 and December 2027.

Meanwhile, dedicated domestic gas fields are supplying system gas to the power sector for cheaper electricity generation, while around 250-300 million cubic feet per day of imported RLNG is also being supplied to power plants.

With winter demand approaching and uncertainty surrounding LNG shipments, authorities are now facing the challenge of balancing limited gas supplies among households, industry and the power sector while securing additional cargoes to prevent a wider supply crunch.

Cabinet committee approves OGRA fee rules, conditionally clears power law amendments

ISLAMABAD

STAFF REPORT

The Cabinet Committee on Disposal of Legislative Business has approved draft rules to revise the fee and charges framework for regulatory and licensing services administered by the Oil and Gas Regulatory Authority (OGRA), while conditionally clearing proposed amendments to the country's principal electric power law. The committee approved the draft OGRA Fees and Charges Rules, aimed at aligning the fee and charges framework for various regulatory and licensing services administered by OGRA with current requirements. It also accorded conditional approval to proposed amendments to the Generation, Transmission and Distribution of Electric Power Act, 1997. The approval is subject to the incorporation of the committee's recommendations and suggestions in the draft. The decisions were taken at a meeting of the Cabinet Committee on Disposal of Legislative Business chaired by Federal Minister for Law and Justice Senator Azam Nazeer Tarar, which reviewed legal and regulatory amendments and rules submitted by various ministries and divisions. The committee also approved an amendment to the Pakistan Coast Guards Act, 1973, aimed at providing a formal legal framework for the rules and regulations governing the Regimental Fund and its administration and operation.

OMCs profit rises 8% to Rs37b despite lower sales

PROFIT
WEB DESK

Pakistan's oil marketing companies (OMCs) sector recorded an 8% YoY increase in earnings to Rs37 billion in FY2025-26 despite a marginal decline in sales, as higher gross profit and lower financing costs supported profitability. OMC sales declined 1% YoY to Rs3.716 trillion during FY26, mainly due to lower sales by Pakistan State Oil (PSO), subdued OMC volumes and a reduced contribution from the liquefied natural gas (LNG) segment. Overall industry sales volumes declined 0.8% during the year. Motor spirit (MS) sales increased 1%, while high-speed diesel (HSD) dispatches fell 0.6%. Despite weaker sales, sector gross profit increased 16% YoY to Rs140 billion, with gross margins standing at 3.8% in FY26.

The sector also benefited from a substantial reduction in financing costs, which fell 24% YoY on the back of lower interest rates and improved liquidity, reducing reliance on short-term borrowing. The sector's effective tax rate, however, remained elevated at 58%.

Fuel prices increased significantly during the year. MS and HSD prices rose 17% and 19% YoY to Rs299.24 and Rs309.54 per litre, respectively, mainly due to higher ex-refinery prices. MS ex-refinery prices increased 14% to Rs191.33 per litre, while HSD ex-refinery prices climbed 32% to Rs232.54 per litre. The increase came amid a sharp rise in international oil, gasoil and gasoline prices following the onset of the US-Iran war in March 2026.

The LNG segment, meanwhile, recorded lower activity. PSO handled 79 LNG cargoes during FY26 compared with 110 cargoes a year earlier, while the delivered ex-ship (DES) price declined to \$8.49 per million British thermal units (mmBtu) from \$9.13 per mmBtu.

Among major OMCs, PSO recorded declines of 4.8% in MS volumes and 5.6% in HSD volumes. Its overall market share contracted by 1.6 percentage points to 42.4% in FY26 from 44% a year earlier. Attock Petroleum Limited (APL) also saw MS volumes decline 1.6%, while its HSD volumes fell 4.5%. Its market share decreased by 0.5 percentage points to 8.2%. In contrast, Gas & Oil Pakistan Ltd (GO) and other smaller OMCs continued to increase their market share during FY26, indicating a gradual shift in the competitive landscape of the country's oil marketing sector.

11	LED/072/26	Enterprise Risk Management Software	01	27 Oct, 26
12	LED/088/26	Tea Material	4260	14 Oct, 26

The above requirement shall be processed on open competitive bidding basis for both international and local bidders as per PPRA Rules.

The tenders will close at 1430 hours and will be opened in public at 1500 hours on the dates mentioned against each Tender at Gas House, 1st Floor, 21-Kashmir Road Lahore. Tender documents can be purchased, upto a day before opening date of each tender, from 1100 hours to 1230 hours on any working day for International tenders & can be obtained from PPRA's Website through EPADS for local tenders. Local manufacturers/suppliers desirous of quoting for above tenders are required to provide a copy of valid Sales Tax Registration, Income Tax, and latest Professional Tax Certificates along with their request for purchase of tender documents. For further information in International Tenders please contact Mr. Nabeel Ishtiaq, at telephone # 042-99201449 and Mr. Muhammad Shahid Ikram for Local Tenders at telephone # 042-98204644. Tender fee (Only for International Tenders) is Rs.2,500/- (non-refundable) each in shape of Pay order/ Demand Draft in favor of SNGPL. Amount of Bid Security is 2% (excluding GST) of estimated value as mentioned in the tender documents. Tender Notice is also available at www.ppra.org.pk & www.sngpl.com.pk.

Note: For Local Tenders the bids are to be submitted on EPADS as well as an Original/Duplicate set of the bid quoted on EPADS alongwith original bid bond must be submitted on or before closing time/date of Tender Enquiry.
