Criterion for Technical Evaluation of BIDS

Healthcare facility procurement is distinct from typical industrial acquisition. It is closely tied to human health, adaptable based on various clinical experiences and progress, and quickly disproving prior theories regarding treatment approaches. In Pakistan's limited and depleted resources, forecasting the management of future medical, surgical, and supporting diagnostic tools is exceedingly difficult. Therefore, clinical and diagnostic experts are allowed the most freedom to choose the most economically and technically feasible product from knowledgeable manufacturers and distributors. The Commandant of POF Hospital creates a technical evaluation committee to examine technical proposals. In order to pick the best, most affordable product that is technically acceptable for this institute, a technical criterion (Annex "A") has been established.
